Admin User Guide

Sophea Naildesign — Content Management System

Audience	Salon owner / staff
Prepared by	Kalapak Team
Version	1.0
Date	10 August 2026

This guide explains how to update website content without writing code.

1. How to log in

1. Open your browser.
2. Go to the Admin login page:

- **Local / review:** `http://localhost:3000/admin/login`
- **Production:** `https://YOUR-DOMAIN/admin/login` *(replace with your live domain)*

3. Enter your email and password.
4. Click **Anmelden**.

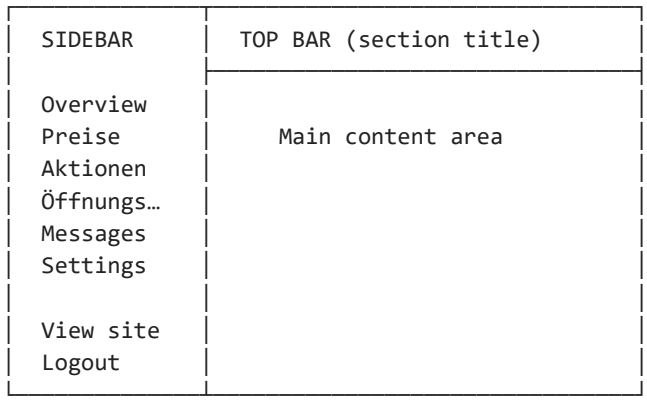

You will land on the **Overview** dashboard.

Default account (temporary)

Field	Value
Email	admin@sopheanaildesign.ch
Password	admin123

Change this password before the website goes public.

2. Dashboard layout

Control	Meaning
Sidebar items	Switch between management modules
View site	Opens the public website in a new tab
Logout	Ends your admin session
Mobile menu	On phones, open the sidebar with the ☰ button

3. Overview

Shows quick statistics:

- Number of **Categories**
- Number of **Services**
- Number of **Promotions**
- Number of **Messages**
- Public API status and phone number

Use this page to confirm the system is healthy after login.

4. Preise (Service prices)

Use this screen to update the CHF prices of your services.

Steps

5. Click **Preise** in the sidebar.
6. Find the category (e.g. *Maniküre/Hände*, *Extras*).
7. Find the service name.
8. Click the price box on the right.
9. Type the new price (example: `45.00`).

10. Click outside the box (or press Tab).

The price is saved automatically when you leave the field.

A confirmation message appears briefly at the bottom-right.

Tips

- Enter numbers only (no “CHF” inside the box).
- Use a dot for decimals: `39.00`
- Refresh the public website to see the new price (hard refresh: `Ctrl + F5` if needed).

---

5. Aktionen (Promotions)

Use this screen to update promotional offer prices.

Steps

11. Click **Aktionen**.
12. Find the promotion card (title + highlight).
13. Edit the **CHF** price.
14. Leave the field to save.

Promotion titles and styles are managed in **Settings** (advanced) if deeper text changes are required.

---

6. Öffnungszeiten (Opening hours)

These hours appear in the website footer.

Steps

15. Click **Öffnungszeiten**.
16. Edit the text next to each day (e.g. `09:00 – 19:00` or `Geschlossen`).
17. Leave the field to save.

Example formats

Example	Meaning
09:00 – 19:00	Open from 9 to 19
10:00 – 18:00	Saturday hours
Geschlossen	Closed

Keep formatting consistent so the footer looks clean.

7. Messages

Shows messages submitted by visitors (when the contact API is used).

Situation	What you see
No messages	Empty state: *Keine Nachrichten*
New messages	Cards with name, email, and message text

Recommendation: Check this page regularly if you enable contact submissions on production.

8. Settings (advanced)

Settings store business information such as:

- Business name
- Phone number
- Address
- Instagram / Facebook links
- Hero and about text

They are shown as **JSON** (structured text).

How to edit safely

18. Click **Settings**.
19. Change only the values between quotes — do not remove commas or braces.
20. Click **Save settings**.
21. If you see an error (*JSON ungültig*), undo your last edit or ask your developer to fix formatting.

Example (simplified):

```
{
  "business_name": "Sophea Naildesign",
  "phone": "079 827 94 98",
  "instagram": "https://www.instagram.com/..."
}
```

If you are not comfortable editing JSON, ask Kalapak Team to change text for you, or request a future upgrade with form fields instead of raw JSON.

9. Daily / weekly checklist

Frequency	Task
Weekly	Review Preise if any prices changed in the salon
When needed	Update Aktionen for seasonal offers
When needed	Update Öffnungszeiten for holidays
Weekly	Check Messages
After go-live	Change admin password

10. Common questions

I logged in but the public site still shows old prices

22. Confirm you left the price field (so it saved).
23. Open the public site and refresh (`Ctrl + F5`).
24. Confirm the frontend is connected to the same backend/API.

I forgot my password

Ask your developer / Kalapak Team to reset the admin password in the database or create a new admin user.

Can I add a new service myself?

The current admin UI focuses on **editing prices** for existing services. Adding/removing services can be done via the API or by requesting a small CMS upgrade (Add / Delete buttons).

Is the Instagram feed editable in Admin?

No. Instagram content comes from the connected Instagram account through the Elfsight widget (same approach as the reference website). Manage posts in Instagram itself.

11. Security tips

25. Do not share the admin URL and password on social media.
26. Use a strong unique password after handover.
27. Log out when finished on a shared computer.
28. Keep the browser updated.

12. Need help?

Contact **Kalapak Team** with:

- What you tried to change
- A screenshot of the screen / error
- Whether you are on local review or the live website
