# Project Delivery Document

**Sophea Naildesign — Full-Stack Website**

| | |
|---|---|
| Project | Sophea Naildesign Website & Admin CMS |
| Client | Sophea Naildesign |
| Prepared by | Kalapak Team |
| Document version | 1.0 |
| Delivery date | 10 August 2026 |
| Status | Delivered — Ready for review & deployment |
| Repository | github.com/kalapak-team/sopheanaildesign |

## 1. Executive Summary

Kalapak Team has designed and developed a full-stack website for **Sophea Naildesign**, a nail studio in Winterthur, Switzerland. The public website closely recreates the look and feel of the existing Webflow presentation site (sopheanaildesign.webflow.io (https://sopheanaildesign.webflow.io/)), while adding a professional **Admin Dashboard** so the salon can update prices, promotions, opening hours, and site content without changing code.

The solution includes:

- A modern, responsive **public website** (desktop & mobile)
- A secure **Admin CMS** with role-based access
- A **Laravel REST API** backend
- A **PostgreSQL** database for production-ready data storage
- Source code hosted on GitHub for long-term ownership and handover

## 2. Project Objectives

| Objective | Result |
|---|---|
| Match the reference website visually | Public site sections, typography, spacing, and imagery aligned to the Webflow design |
| Make content editable by the salon | Admin panel for prices, promotions, hours, settings, and messages |
| Use a modern, maintainable stack | React / Next.js frontend + Laravel API + PostgreSQL |
| Provide a clear handover | Source code, documentation, and credentials process included |

# 3. Scope of Delivery

## 3.1 In scope (delivered)

**Public website**

- Hero section with fixed background and brand messaging
- Image carousel / slider
- Price list (Preisliste) section
- About ("Über Mich") section
- Study / benefits section ("Überraschende Studie")
- Services ("Dienstleistungen") section
- Promotions ("Aktionen") section
- Instagram feed (Elfsight widget, matching the reference site)
- Footer with logo, phone, opening hours, location, and social links
- Sticky navigation that appears on scroll
- Brand favicon

**Admin CMS** (`/admin`)

- Secure login
- Overview dashboard with key statistics
- Edit service prices by category
- Edit promotion prices
- Edit opening hours
- View contact / enquiry messages
- Edit advanced site settings (JSON)
- Logout and "View site" shortcut

**Backend & data**

- Laravel API with Sanctum authentication
- Admin role
- PostgreSQL database (`sopheanaildesign`) with migrations and seed data
- Seeded default admin account and salon content

**Documentation & code**

- This delivery document
- Admin user guide
- Technical README for developers
- GitHub repository

### 3.2 Out of scope / client follow-up

The following are **not** completed as part of this development delivery and typically belong to hosting / business setup:

- Custom domain connection (e.g. `sopheanaildesign.ch`)
- Production hosting (VPS, Vercel, Forge, cPanel, etc.)
- SSL certificate on production
- Production email / SMTP for contact notifications
- App Store / Google Play apps
- Ongoing SEO campaigns or Google Ads
- Legal pages (Impressum / Datenschutz) beyond what already exists in content — confirm with your lawyer if required in Switzerland

---

## 4. Website Walkthrough (Public Site)

The homepage follows the same section order as the reference site.

| # | Section | Purpose |
|---|---|---|
| 1 | Hero | Strong first impression: brand, tagline, phone, social icons; background stays fixed while scrolling |
| 2 | Carousel | Showcase salon / nail images with arrows and pagination dots |
| 3 | Preisliste | Visual price list presentation |
| 4 | Über Mich | About the studio / brand story |
| 5 | Überraschende Studie | Highlighted benefits / study content |
| 6 | Dienstleistungen | Services introduction with imagery |
| 7 | Aktionen | Current promotions with large price display |
| 8 | Instagram | Live Instagram feed via Elfsight widget |
| 9 | Footer / Kontakt | Phone, hours, address, social links, copyright |

**Navigation**

- Header menu on the hero
- Fixed white navigation bar after scrolling past the hero
- Links: Über Mich · Dienstleistungen · Aktionen · Preise · Kontakt

**Local preview URLs (development)**

| Item | URL |
|---|---|
| Public website | http://localhost:3000 |
| Admin login | http://localhost:3000/admin/login |
| Admin dashboard | http://localhost:3000/admin |
| Backend API | http://127.0.0.1:8000/api |

Production URLs will replace these after hosting is configured.

## 5. Admin CMS Overview

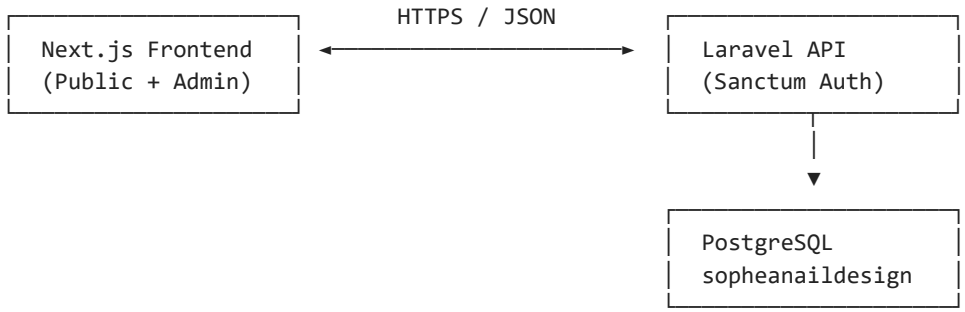

The Admin panel is a professional dashboard for salon staff.

| Module | What the client can do |
|---|---|
| Overview | See counts of categories, services, promotions, and messages; API status |
| Preise | Update CHF prices per service; changes save when leaving the price field |
| Aktionen | Update promotion prices |
| Öffnungszeiten | Update opening hours shown in the footer |
| Messages | Review visitor messages (when the contact channel is used) |
| Settings | Advanced site settings (phone, address, social links, text content) as JSON |

A separate step-by-step guide is provided in:

**`docs/ADMIN_USER_GUIDE.md`**

## 6. Technology Architecture

| Layer | Technology | Role |
|---|---|---|
| Frontend | React, Next.js 15, Tailwind CSS | Public website + Admin UI |
| Backend | Laravel (PHP), Sanctum | REST API, authentication, business logic |
| Database | PostgreSQL 18 | Persistent content & users |
| Auth | Bearer token (Sanctum) | Protects admin endpoints |
| Source control | GitHub | Version history & handover |

**Project folders**

```
sopheanaildesign/
├── frontend/     → Public site + Admin dashboard
├── backend/      → Laravel API + database migrations/seeders
├── docs/         → Client & handover documentation
└── README.md     → Developer quick start
```

## 7. Database & Content

**Database name:** `sopheanaildesign`

**Main content tables:**

| Table | Content |
|---|---|
| users | Admin accounts (role: admin) |
| service_categories | Price categories (e.g. Maniküre, Extras) |
| services | Individual services and prices |
| promotions | Aktionen / promotional offers |
| opening_hours | Days and hours for the footer |
| site_settings | Phone, address, social, text blocks |
| hero_slides | Carousel images |
| gallery_images | Gallery assets |
| contact_messages | Visitor messages |

Initial content has been seeded to match the salon's published information (services, promotions, hours, phone, etc.).

## 8. Security & Access

| Control | Implementation |
|---|---|
| Admin authentication | Email + password login |
| Session / API auth | Laravel Sanctum personal access tokens |
| Role | admin role required for management endpoints |
| Secrets | .env files are not stored in GitHub |
| Public API | Read-only site data endpoint for the frontend |

### Default admin account (development / handover)

| Field | Value |
|---|---|
| Email | admin@sopheanaildesign.ch |
| Temporary password | admin123 |
| Role | admin |

**Important security recommendation**

Change this password immediately after handover, and before going live on a public domain. Do **not** share this document widely with the temporary password still active. Prefer sending credentials in a separate private message.

---

## 9. API Summary (for technical stakeholders)

| Method | Endpoint | Access | Description |
|---|---|---|---|
| GET | /api/site | Public | Full site payload for the frontend |
| POST | /api/contact | Public | Submit contact message |
| POST | /api/admin/login | Public | Admin login → token |
| POST | /api/admin/logout | Admin | Logout |
| GET/PUT/... | /api/admin/* | Admin | Manage prices, promotions, hours, settings, messages |

Full route list is in `backend/routes/api.php`.

---

## 10. How to Run Locally (for review)

### Backend

```
cd backend
composer install
copy .env.example .env
php artisan key:generate
# Configure PostgreSQL in .env (DB_CONNECTION=pgsql, etc.)
php artisan migrate --seed
php artisan serve
```

### Frontend

```
cd frontend
npm install
npm run dev
```

Then open `http://localhost:3000` and `http://localhost:3000/admin/login`.

## 11. Deployment Recommendations

To put the site live for customers, the client (or hosting partner) should:

1. **Provision hosting**

- Frontend: Node hosting suitable for Next.js (e.g. Vercel, or a VPS)
- Backend: PHP 8.2+ host with Composer (e.g. Laravel Forge, shared hosting with SSH, or VPS)
- Database: Managed PostgreSQL or same VPS

2. **Configure environment**

- Set production `.env` (APP_KEY, DB_*, APP_URL, FRONTEND_URL, CORS)
- Point frontend API URL to the production API

3. **Connect domain & SSL**

- DNS A/CNAME records
- HTTPS certificate

4. **Hardening**

- Change admin password
- Disable debug mode (`APP_DEBUG=false`)
- Restrict admin URL if desired (optional IP allowlist / extra auth)

Kalapak Team can provide a separate **Deployment Proposal** if the client requests production setup as an additional service.

## 12. Acceptance Checklist

Please confirm each item during handover review:

| # | Item | OK |
|---|---|---|
| 1 | Homepage matches agreed visual design / reference | ☐ |
| 2 | All main sections display correctly on desktop | ☐ |
| 3 | Mobile layout is usable and branded | ☐ |
| 4 | Navigation and footer links work | ☐ |
| 5 | Admin login works | ☐ |
| 6 | Prices can be updated from Admin → Preise | ☐ |
| 7 | Promotions can be updated from Admin → Aktionen | ☐ |
| 8 | Opening hours can be updated from Admin → Öffnungszeiten | ☐ |
| 9 | Site settings are accessible | ☐ |
| 10 | Source code is available on GitHub | ☐ |
| 11 | Delivery documentation received | ☐ |
| 12 | Temporary admin password will be changed before go-live | ☐ |

**Client acceptance**

| | |
|---|---|
| Accepted by (name) | _____ |
| Signature | _____ |
| Date | _____ |

## 13. Support & Change Requests

| Type | Typical handling |
|---|---|
| Bug (feature does not work as delivered) | Covered during agreed warranty / support window |
| Change request (new section, new language, booking system, etc.) | Quoted separately |
| Hosting / domain / email | Separate ops task unless included in a hosting package |

Suggested warranty period (customize as needed): **30 days** after acceptance for defect fixes related to delivered scope.

## 14. Handover Package Contents

| Item | Location |
|---|---|
| Source code | github.com/kalapak-team/sopheanaildesign |
| This delivery document | docs/CLIENT_DELIVERY.md |
| Admin user guide | docs/ADMIN_USER_GUIDE.md |
| Developer README | README.md |
| Environment template | backend/.env.example |
